Sir:

I, Masahiro Yatake, do declare and state that:

I graduated from Science and Technology of  
Nagasaki University, Department of Materials Science and

been principally engaged in development relating to magnet optical media in said company.

After that, I have been principally engaged in development relating to ink jet inks in said company.

I am the sole inventor of the invention described and claimed in the above-identified application and am familiar with the Office Action dated August 22, 2006 issued therein.

The following comparative experimentation was conducted by me or under my supervision to demonstrate the unexpected superiority of the claimed invention.

**Declaration Under 37 CFR 1.132**

**Notes:**

- \*1) Water-soluble pigment 1 used in Example 7 of the present application
- \*2) Compound used in Example 6 of the present application
- \*3) Compound used in Example 2 of Yui et al.
- \*4) Compound used in Example 2 of Yui et al.

Using each of the thus obtained ink compositions, printing was carried out in the same manner as in the Examples of the present application. The resulting printed sheet obtained with the ink of the Invention Example and that obtained with the ink of the Comparative Example are attached hereto as Exhibit A-1 and Exhibit A-2, respectively. The printed sheet obtained with the ink of the Comparative Example (i.e., Exhibit A-2) shows less color development and white (blank) streaks generated in solid-printing portions and large characters.

In addition, closeup pictures of the letter "機" in Exhibits A-1 and A-2 were taken and they are both shown in Exhibit B attached hereto for comparison. As can be seen therefrom, a distinct image is obtained in the Invention Example, whereas the image obtained in the Comparative Example is thinned and blurred.

I declare further that all statements made herein of my own knowledge are true and that all statements made
